## Ⅰ. 学長の定める重点目標

## Ⅰ-1. 教育大学教員としての授業実践

本学の目的は、豊かな教養と教育実践力をもった教員を養成し、学校現場に送り出すことにある。このことを実現するには、教科専門・教科教育・教職専門等の各分野の授業が、学校現場の実践と関連性が保たれている必要がある。あなたは、教員養成大学の教員として、本年度はどのような授業計画を立て実現しようとするのか、これまでの取り組み状況を総括し、具体的に示して欲しい。

## 1. 目標・計画

I will focus on improving students practical communicative ability in my University classes as follows:  
Classes will be conducted using English providing ample L2 (English) input for students  
Lessons will be task-based, requiring students to negotiate meaningful content and solve problems using English.  
In 小学校英語演習 students will be given English reading material before class. During class, the content of the reading will be reviewed and discuss. Then, following class students will be encouraged to re-read the material, thus encountering the same English content at least three times in a natural setting.

The material used in class will also be authentic and meaningful:  
Material for 英語コミュニケーション classes will be derived from the internet and other authentic sources and will also include student-generated material.  
Education-related classes (初等英語教育 and 小学校英語演習) will include material and video from the classroom at 附属小学校)

## 2. 点検・評価

I have helped students improve their communicative ability by:  
-using English only in class  
-using authentic material, related to students areas of interest (eg. we used material from the internet to talk about issues in education, etc.)  
-using a task based approach and a variety of other communicative approaches (Content based instruction, et.)  
-in 初等英語教育 and 小学校英語演習 I showed video and material used at 附属小学校 to introduce practical ideas and bring reality into the classroom
