Okawa, N., Yoshimoto, S., Nagai, J., Matsuura, T., Nakagami, M. & Katsuno, S. (2007). A population-based epidemiologic study on anemia and the related factors among schoolchildren in a rural district of Japan: Plasma ascorbic acid and anemia. *The Journal of Education and Health Science, 53*, 193-201.

Fundamental

Keywords: schoolchildren, anemia, plasma ascorbic acid, population-based study

< 2006 >

Hirose, M. & Hosoi, E. (2006). Prognosis-related gene expression in PBL, IL-2L, EBV-LCL, and wild type and drug resistant cultured cells. *Research Bulletin of Naruto University of Education, 21*, 397-407.

Fundamental

Keywords: cultured cell, drug resistance, prognosis, gene, expression

Kasai, M. (2006). Empirical research on therapeutic alliance, session evaluation, and therapist intention in the process of therapist training. *Journal of Japanese Clinical Psychology, 24*, 87-98.

Applied

Keywords: therapist, training, working alliance, session evaluation, therapist intention

Nagai, J., Yoahimoto, S., Matsuura, T., Nishioka, N., Ariyoshi, A., Kawashimo, Y., Okawa, N., Kawashima, T., Akahoshi, T., Takemoto, Y. & Katsuno, S. (2006). A community-based study on dietary intake among school-age children: -Trend in dietary intake of the fifth grade schoolchildren over 13 years (1986-1999) in Goshiki town of Hyogo prefecture-. *Japanese Journal of School Health*, 48, 528-540.

**Fundamental**

Keywords: school age children, dietary intake, life-style related disease, risk factor, epidemiology

Okawa, N., Nagai, J., Yoshimoto, S., Matsuura, T., Nakagami, M. & Katsuno, S. (2006). A population-based epidemiologic study on anemia and the related factors among schoolchildren in a rural district of Japan: Cross sectional study. *The Journal of Education and Health Science*, 52, 134-145.

**Fundamental**

Keywords: schoolchildren, anemia, nutrition, physical fitness, population-based study

Terada, T., Kasai, M., & Asano, K. (2006). Psychological support for junior high school students: Sibling order and sex. *Psychological Reports*, 99, 179-190.

**Fundamental**

Keywords: psychological support, junior high school, sibling order, sex difference

Yamasaki, K., Katsuma, L., & Sakai, A. (2006). Development of a Japanese version of the PANAS-C. *Psychological Reports*, 99, 535-546.

**Fundamental**

Keywords: PANAS-C, positive affect, negative affect, elementary school children

Yamasaki, K., & Uchida, K. (2006). Relation of positive affect with emotion-focused coping in Japanese undergraduates. *Psychological Reports*, 98, 611-620.

**Fundamental**

Keywords: positive affect, emotion-focused coping, undergraduate

Yamasaki, K. (2006). Roles of positive affect: The phenomena and mechanisms. *Japanese Journal of Personality*, 14, 305-321.

**Fundamental**

Keywords: positive affect, negative affect, roles of positive affect, mechanisms underlying benefits, review

Yamasaki, K., Sakai, A., & Uchida, K. (2006). A longitudinal study of the relationship between positive affect and both problem- and emotion-focused coping strategies. *Social Behavior and Personality: An International Journal*, 34, 499-510.

Fundamental

Keywords: positive affect, problem-focused coping, emotion-focused coping, longitudinal study, undergraduate

Yamasaki, K., & Fujii, S. (2006). Health intervention protocols for lifestyle disease prevention in Japanese elementary school children. *Research Bulletin of Naruto University of Education*, 21, 1-12.

Applied

Keywords: lifestyle disease, intervention program, elementary school children, school

< 2005 >

Kasai, M., & Edagawa, H. (2005). The structured encounter group facilitated by elementary school pupils. *The Japanese Journal of the Study of Guidance and Counseling*, 4, 72-82.

Applied

Keywords: elementary school, structured group encounter, leadership, school adjustment

Kasai, M., Nomura, K., & Uefuji, R. (2005). Helping teachers understand children from clinical and psychological perspectives. *Bulletin of Center for Collaboration in Community Naruto University of Education*, 20, 55-67.

Applied

Keywords: teacher, child understanding, drawings, clinical psychology, elementary school

Yamasaki, K., & Matsumura, T. (2005). Prevention of youth violence: Development of a universal prevention program at school. *Bulletin of Research Center for School Education (Naruto University of Education)*, 20, 11-20.

Applied

Keywords: violence, intervention program, elementary school children, school

< 2004 >

Akahoshi, T., Yoshimoto, S., Nishioka, N., Nagai, J., Matsuura, T., & Kastuno, S. (2004). A population-based study on serum uric acid and cardio- and cerebro-vascular risks among schoolchildren in Japan: The Goshiki Health Study (1) Study design and distribution of serum uric acid. *Japanese Journal of School Health*, 45, 528-540.

Fundamental

Keywords: serum uric acid, schoolchildren risk factors of lifestyle-related disease, population-based study

Hasegawa, S., Kasai, M., & Kagawa, M. (2004). The effect of "Karada Hogushi no Undo (exercise for relaxing body and mind)" to the interpersonal relationship of elementary school children: Psychological effectiveness of physical relaxation.

*The Japanese Journal of the Study of Guidance and Counseling*, 3, 100-109.

Applied

Keywords: elementary school, physical relaxation, gymnastics, interpersonal relationship

Ishizawa, K., Yoshizumi, M., Tuchiya, K., Houchi, H., Minakuchi, K., Izawa, Y., Kanematu, Y., Kagami, S., Hirose, M., & Tamaki, T. (2004). Dual effects of endothelin-1(1-31): Induction of mesangial cell migration and facilitation of monocyte recruitment through monocyte chemoattractant protein-1 production by mesangial cells. *Hypertension Research*, 27, 433-440.

Fundamental

Keywords: endothelin, mesangial cell, monocyte, induction

Yamasaki, K., & Oka, Y. (2004). An educational intervention program to reduce aggressiveness in elementary school children: A description of the program and its effects during two months of follow-up. *Japanese Research of Morality Psychology*, 18, 15-20.

Applied

Keywords: aggression, intervention program, elementary school children, school

< 2003 >

Enns, C., & Kasai, M. (2003). Hakoniwa: Japanese sandplay therapy. *Counseling Psychologist*, 31, 93-112.

Applied

Keywords: sandplay, therapy, Japan, Jung, Kalf

Hosoi, E., Hirose, M., & Hamano, S. (2003). Expression levels of H-type (1, 2)-fucosyltransferase gene and histo-blood group ABO gene corresponding to hematopoietic cell differentiation.

*Transfusion*, 43, 65-71.

Fundamental

Keywords: transfusion, blood type, gene, expression, differentiation

Ikeya, T., & Kasai, M. (2003). A study of social skills and self-esteem of elementary school pupils. *Japanese Journal of Counseling Science*, 36, 206-220.

Applied

Keywords: elementary school, social skills, self-esteem, peer support, role-playing

<2002>

Moriwaki, Y., Ishikawa, T., Kawabata, T., Tanaka, A., Hirota, S., Kastuno, S., Nishioka, N. & Yoshimoto, S. (2002). School-based program for the drug education at Hounslow, London, in Britain. *Japanese Journal of School Health*, 44, 338-351.

**Fundamental**

Keywords: drug education, life-skill, Britain
