

3rd International Cooperation Talk Show

Special Lecture

Role and Possibility of Research in Mathematics Education and International Cooperation

Professor Takuya BABA

Graduate School of Humanities and Social Sciences
Hiroshima University, JAPAN

Being engaged with international cooperation in mathematics education since 1984, this presentation reflects the points which have been encountered at different missions and stages. This lecture takes you along the travel of research theme. After the travel, it is important to make a step ahead to open a new possibility in intersection of mathematics education and international cooperation.
